

## Applied Knowledge

Classroom Visit

*Building on Class Knowledge Series*

Great for: courses in subjects that closely align with the Museum's collections, such as art, anthropology, archaeology, area studies, gender studies, history, and religious studies.

Class Time	One visit of 1-1.5 hours
Class Level	Introductory to Intermediate Undergraduate
Class Size	Maximum of 10-15 students
Objectives	Connect themes, subjects, or approaches from class with real examples; practice critical thinking and information synthesis.
Prep	Instructors work with AED staff to identify Museum objects that best align with the course material to be addressed and require application of course knowledge to create an in-class activity. Instructor should select and assign any necessary supplemental reading.
Visit	Students examine the objects (alone or in groups) and complete the in-class activity.
Post	Students share in class discussion or short response prompt how they used course knowledge to complete activity, or pose future questions based on their experience (optional).

### Examples:

- Students from a Japanese Civilization course identify ceramics and prints from different periods and work in groups to put them in chronological order.
- Students from an Age of Caesar course examine different coins minted under Caesar to extrapolate the different visual messages that were in circulation.
